

PROFESSIONAL DEVELOPMENT PLAN

GATE 1

NAME: JENNIFER NELSON
MARCH 17, 2012

DATE:

Professional Goal Statement 1: I want to have experience using a variety of technology, and through this experience gain confidence and knoweldge enough so that I have no fear in using technology in my classroom.

What changes in your plan were required in order to meet your goal? I did not have to change my plan at all. I feel I have met the goal. I feel more confident using technology in my classroom.

What additional activities did you complete in order to meet your goal? All of the activities that required me to use technology, such as making a wiki, creating the online class, making a powerpoint, and answering a blog helped me meet this goal. In my classroom I did a few additional things, such as create a Jog the Web and create and use Prezi in my classroom.

What are any remaining challenges you will need to resolve? I still feel like I want to know more of the trouble shooting things. Technology does not always work as planned. When that happens I tend to panic and not know what to do.

How has your plan allowed you to support student learning? I have made and used several powerpoints, Prezi presentations, and Kidblog in my classroom. My students have created their own Prezi presentations. These have been activities that have enhanced student learning.

What type of collaboration did you engage in to meet the new goals? I collaborated with other Spanish teachers in my building who also teach the same grade level classes as I do. We planned and implemented some of the same assignments incorporating technology into our lessons, and worked together to create grading rubrics for the assignments.

<i>Outcomes</i>	<i>Activities</i>	<i>Evaluation method</i>	<i>WI Teacher Standard</i>
Increase cultural awareness Increase lanugage acquision	Using Kidblog and Skype in my classroom for students to communicate with our pals from Ecuador.	Students were able to use Kidblog.org to communicate with students from Ecuador. We will communicate using Skype in late April.	4, 5, 6

Professional Goal Statement 2: Use technology in my classroom to engage and motivate my students.

What changes in your plan were required in order to meet your goal? I did not need to change anything. This year I created and used more multimedia, web 2.0 tools and web resources to engage and motivate my students.

What additional activities did you complete in order to meet your goal? All of the activities listed below were additional activities that I incorporated into my teaching to increase student motivation and engagement while learning.

What are any remaining challenges you will need to resolve? This will be an ongoing goal, requiring me to constantly be learning how to use and incorporate new web 2.0 tools and finding new web resources to use in my teaching.

How has your plan allowed you to support student learning? Using web2.0 tools and various web resources is helping me to create 21st century learners.

What type of collaboration did you engage in to meet the new goals? Through discussion questions in my Marian classes I learned about many web resources and web 2.0 tools that I later tried. In addition in sharing with my coworkers, I learned about many resources that I used with my students.

<i>Outcomes</i>	<i>Activities</i>	<i>Evaluation method</i>	<i>WI Teacher Standard</i>
Create presentation tools and lessons that incorporate multimedia tools and web 2.0 tools, and use various web resources to support student learning	Prezi Jog the Web Power Point Screencast Kidblog You Tube videos QR codes	Observation of students work and excitement levels. Student Surveys Rubrics for grading student projects	1, 2, 3, 6, 8
